

The following is a description of **Sharp Electronics' program** for carrying the rebate portion of a DC Power invoice:

Sharp will carry the rebate portion of a DC Power invoice for 90 days from the day the modules ship, as long as the invoice is for Sharp PV modules. The rebate is reassigned by you/customer to Sharp, who then credits us the rebate amount. We in turn put the credited rebate amount against your DC Power invoice.

The balance of that invoice is due per the terms you have with DC Power, usually net 30. If the rebate does not pay within the 90 days, you may choose from the following:

- A finance charge of 1.5% / month, 18% / year will accrue on the unpaid portion of that invoice, until it is paid off.
- You may pay off the rebate portion to DC Power, and we will reimburse you when the rebate pays to Sharp/us.

DC Power does not fill out any of the paperwork that gets submitted to the New Jersey Clean Energy etc. That will still be in your hands.

If you choose to take advantage of the Sharp program, then I will need the following from you, preferably before the modules ship.

EPBB only, Sharp will not carry a PBI rebate.

The following are Sharp's requirements:

1. **Reservation Request Form** (copy of the application that shows a the system components).
2. **Conditional /or/ Confirmed Reservation Notice Letter.** (Showing the amount approved and the expiration date of the rebate)
3. **Rebate reassignment letter** (from the NJCE stating the rebate has been reassigned to Sharp)
4. **Two Confidentiality waivers (allows Sharp and DC to check on rebate status. These utilities will not talk with us re: the rebate, without these waivers.)**
 - **authorizing Sharp Electronics**
 - **authorizing DC Power Systems**
